WINTER TRANSPORTATION AND TRAVEL PROBLEMS**

15 PASSENGER

GENERAL SPECIFICATIONS

Capacity	15 passengers or 2,500 lbs.
Engine	Chrysler Industrial 251 — 115 H.P.
Transmission	3-speed forward one reverse
Differential	Hypoid ratio 4.1 to 1
Rear suspension	8 independent wheels
Rear tracks	Rubber and steel (endless) — 17½ inc. wide, 22½ feet overall length
Track belts	Rubber reinforced with steel cable (endless)
Ski dimensions	60 inches x 12 inches
Rear tires	4.50 x 16, 4 ply
Width center to center of tracks	58 inches
Front suspension	Coil springs
Chassis	Toboggan type entirely enclosed
Body	All steel completely welded
Weight	4300 lbs.
Overall length of unit	17 feet, 8 inches
Overall width of unit	78 inches
Height	79 inches
Cruising speed	25 - 30 M.P.H.
Maximum speed	45 M.P.H.

BOMBARDIER SNOWMOBILES

ALL PURPOSE WINTER VEHICLES

WHAT THEY ARE

The snowmobile, which has revolutionized winter transportation, is now the accepted means of travel wherever snow and other conditions make all other passenger conveyance impractical. It has become an integral part of everyday living in hundreds of snow-bound regions and renders invaluable service in many outlying districts where it is used for the most varied purposes.

With the adaptation of standard front wheels interchangeable with the skis, the Bombardier snowmobile has been made even more useful as it can now be used 365 days a year not only on snow but also on marshy land, muddy soil or soft ground. Its traction power has been tested and proven in all sorts of operating conditions and it can travel as easily cross-country as it can on the open road. Where other means of transportation fail, the Bombardier will succeed well beyond the possibilities of any other form of standard motor transportation.

The Bombardier snowmobiles are manufactured in two sizes to accommodate the various classes of users. The 12 passenger model has a narrower tread width; it is the same as that of sleighs which can be towed behind. On account of this, it is favored by the forest industries as it can be maneuvered easily almost anywhere in the woods.

The 15 passenger model with its larger seating capacity and greater loading space is much in demand by transportation companies, school boards and other bodies requiring wider winter vehicles.

The ways in which Bombardier snowmobiles may be used are far too numerous to mention. They are the most versatile vehicles ever designed and they are being used in a variety of operations which defies the imagination. Be it sufficient to say that whenever a transportation problem is met the answer is bound to be the BOMBARDIER SNOWMOBILE.

They are powered by **CHRYSLER engines**

BOMBARDIER SNOWMOBILES

WHAT THEY DO

AMBULANCE :

Bombardier Snowmobiles render invaluable service as ambulances in all sorts of emergencies : storms, snow blocked roads, etc.

SCHOOL BUSES :

Many school boards have adopted the Bombardier snowmobile to convey children to and from school during Winter and early Spring.

TRANSPORTATION :

For wintertime general delivery, nothing can beat a Bombardier. The Snowmobile can be loaded with goods or hitched on to a sleigh to deliver supplies in isolated regions with ease and total dependability.

RESCUE WORK :

Countless people owe their lives to the timely help brought to them during or after snowstorms by rescue parties using Snowmobiles.

WINTER BUSES :

Bus service is never interrupted by a snow storm when passengers are carried safely and rapidly in a Bombardier.

POSTAL SERVICE :

Isolated communities, even in the most remote districts, can enjoy postal delivery every day with a Snowmobile.

FOREST INDUSTRIES :

While the main job performed by Snow-

mobiles in woodlands operations is the hauling of log trains, they are also widely used for the transportation of men and supplies to the camps.

PUBLIC UTILITIES :

Efficient telephone and hydro-electric service is maintained at all times by companies who use the Snowmobile to answer service calls during storms, and in off-highway places.

FISHING :

Bombardier Snowmobiles are a boon to commercial fishing. They can carry fresh fish to consumers or shipping points rapidly and efficiently.

DOCTORS :

No country doctor need now be handicapped by weather or ground conditions in spring, fall, or winter. He can speedily answer any call in a Bombardier Snowmobile.

PROSPECTORS :

In their search for claims, many prospectors have found the Bombardier Snowmobile an indispensable ally over snow and marshy grounds.

SPORTS :

Anglers, hunters, skiers, guides, fishing resort operators find things much more enjoyable when they travel in a comfortable Bombardier Snowmobile.
